

Job Posting – Management Consulting Analyst

NewGen Strategies and Solutions, LLC (NewGen) is a management and economic consulting firm specializing in serving public and private sector utilities. We provide financial, cost of service, rate design, valuation, strategy, expert witness, stakeholder, and sustainability consulting services to our clients.

The firm provides a wide variety of consulting services to water, wastewater, solid waste, electric, and natural gas utilities, regional planning agencies, utility commissions, state and federal agencies, law firms, and financial institutions. NewGen has 35 employees in 10 offices nationwide.

Typical services provided by NewGen include retail and wholesale utility rate studies, planning studies, appraisals, depreciation studies, financial modeling, economic impact and end-user analyses, feasibility studies, sustainability services, strategy and stakeholder services, contract development and negotiation, and litigation support services before regulatory agencies.

Job Description

Analyst will assist with the development of user-friendly Microsoft Excel models that evaluate utility financial, technical, and operational data to provide reports, insight, and action plans. The successful candidate will work directly with Senior Consultants and client project teams to diagnose issues and collaboratively design effective solutions. The duties of this position include, but are not limited to:

- Perform quantitative and qualitative financial and economic analyses to support end-user models utilizing Microsoft Office suite of products.
- Perform industry and/or project-specific research.
- Prepare reports and/or memoranda summarizing data analysis and results.

Qualifications

The successful candidate will have the following qualifications:

- Undergraduate degree in Accounting, Business, Data Analytics, Economics, or Finance preferred.
- Proficiency with Microsoft Office Suite (Word, Excel, PowerPoint, Outlook); advanced experience with Microsoft Excel preferred.
- Team oriented and demonstrate analytical skills in the areas of economics, financial planning, and utility accounting.
- Detail-oriented; able to follow written and/or oral instructions; and have strong, clear, and concise written and verbal language skills.
- Prior knowledge and experience with energy, water, or other utility industries or local government finance is a plus, but not required.
- Able to work on multiple assignments for different supervisors either individually or as part of a team.
