

Regulated Utility Financial Analyst / Consultant

About NewGen

NewGen Strategies and Solutions, LLC (NewGen) is a boutique Economic, Financial, Energy, and Environmental Consulting firm specializing in providing professional services to all levels of government and public and private sector utilities. The firm provides a wide variety of consulting services to electric, water, wastewater, solid waste, and natural gas utilities, in addition to regional planning agencies, utility commissions, state and federal agencies, law firms, and financial institutions.

Our small firm size (50 employees) allows us to be responsive to clients and offer our employees direct exposure to industry experts and senior management within the company. We have a collegial and supportive culture and embrace teamwork and individual contributions to our projects. We believe employee development through training, mentoring, and project exposure is key to delivering high quality consulting services through motivated teams.

We also value the communities in which we live and work, and accordingly commit 1% of revenue to charities within our communities. All employees have a say in how and to which organizations these funds are donated.

Providing consulting services is hard work, full of project deadlines and client deliverables. We pride ourselves on the work we accomplish for our clients, but we also make time for socializing and sharing life experiences, hobbies, and personal accomplishments. We value talented, enthusiastic, bold, and creative individuals who seek to make an impact in important industries within our society.

Job Description

NewGen is currently hiring at the undergraduate and/or graduate level for a Regulated Utility Financial Analyst/Consultant role in our Richardson, Texas (Dallas); Austin, Texas; or Lakewood, Colorado (Denver) office. Duties of this position include, but are not limited to:

- Assist in the preparation, review, and analysis of regulated utility retail applications before regulatory utility commissions and courts of law including the examination, preparation, and challenge of revenue requirements, cost of service, and rate design.
- Participate in and support ongoing litigation efforts, including the review and preparation of discovery, filings, schedules, workpapers, testimony, and settlement materials.
- Review and analyze financial statements and financial information to assess overall utility management, financial performance, and adequacy of current and proposed pricing structures.

This position is a full-time position, with benefits including holidays, personal time off, and a retirement program.

Minimum Qualifications

- Degree in accounting, finance, engineering, or similarly rigorous program with a focus on economics or mathematics from an accredited four (4) year college or university.
- Extremely detailed oriented with strong analytical and quantitative skills, including a knowledge of financial forecasting modeling techniques in Microsoft Excel.

Regulated Utility Financial Analyst Position

Preferred Qualifications

- Prior experience with utilities such as electric, water, wastewater, or natural gas.
- Knowledge of the NARUC or FERC System of Accounts, regulatory and administrative law process, and general ratemaking guidelines promulgated by the American Water Works Association and Water Environment Federation.
- Preference for at least three (3) years of full-time work experience in utility accounting or finance, public accounting, regulatory commission staff, or directly related work experience.

Knowledge, Skills, and Abilities

- Proficiency in, and preferably advanced knowledge of, Microsoft Excel and Word
- Exceptional oral and written communication skills
- Strong analytical and quantitative skills
- Excellent attention to detail and organization
- A working knowledge of regulatory commission processes and administrative law as applied to utilities
